Willcox Community Center 5:00pm to 8:30pm
Topics: Water Legislation over the years
Advocating for effective change in water policy

A group of local stakeholders will be gathered at the culmination of this Seminar. Bi-weekly and Professionally Moderated sessions will begin to create a plan from all ideas: Learned in Seminar, learned by former efforts to create legislation, ideas submitted in the "Seminar Comment Box" and any that are discovered during the stakeholder process. The process could take several months. When that is complete we will hold a final Session of the Sulpher Springs Valley Community Water Seminars and present our discoveries and final idea to the group, seeking their approval and support.

For Questions Please Call: Supervisor Peggy Judd 520-366-2826
